

1990 Index

IEEE Transactions on Software Engineering

Vol. 16

This index covers all items — papers, correspondence, reviews, etc. — that appeared in this periodical during 1990, and items from previous years that were commented upon or corrected in 1990.

The *Author Index* contains the primary entry for each item, listed under the first author's name, and cross-references from all coauthors. The *Subject Index* contains several entries for each item under appropriate subject headings, and subject cross-references.

It is always necessary to refer to the primary entry in the *Author Index* for the exact title, coauthors, and comments/corrections.

AUTHOR INDEX

A

- Aguera, Martine**, *see* Arlat, Jean, *T-SE Feb 90 166-182*
Al-Mouhamed, Mayez A. Lower bound on the number of processors and time for scheduling precedence graphs with communication costs; *T-SE Dec 90 1390-1401*
Amat, Louis, *see* Arlat, Jean, *T-SE Feb 90 166-182*
Angelaccio, Michele, Tiziana Catarci, and Giuseppe Santucci. QBD: A graphical query language with recursion; *T-SE Oct 90 1150-1163*
Arlat, Jean, Martine Aguera, Louis Amat, Yves Crouzet, Jean-Charles Fabre, Jean-Claude Laprie, Eliane Martins, and David Powell. Fault injection for dependability validation: A methodology and some applications; *T-SE Feb 90 166-182*

B

- Balasubramanian, Vijay**, and Prithviraj Banerjee. Tradeoffs in the design of efficient algorithm-based error detection schemes for hypercube multiprocessors; *T-SE Feb 90 183-196*
Banerjee, Prithviraj, *see* Balasubramanian, Vijay, *T-SE Feb 90 183-196*
Barbosa, Valmir C. Strategies for the prevention of communication deadlocks in distributed parallel programs (Corresp.); *T-SE Nov 90 1311-1316*
Barucci, Elena, Renzo Pinzani, and Renzo Sprugnoli. Optimal selection of secondary indexes; *T-SE Jan 90 32-38*
Basili, Victor R., Ed.-in-Chief. Editor's comments; *T-SE May 90 489*
Basili, Victor R., Ed.-in-Chief. Editor's comments; *T-SE Dec 90 1321*
Batory, Don S., *see* Mannino, Michael V., *T-SE Nov 90 1258-1272*
Becker, G., and L. Camarinopoulos. A Bayesian estimation method for the failure rate of a possibly correct program (Concise p.); *T-SE Nov 90 1307-1310*
Benader, Alan C., *see* Gorla, Narasimhaiah, *T-SE Feb 90 223-231*
Benander, Barbara A., *see* Gorla, Narasimhaiah, *T-SE Feb 90 223-231*
Berger, Jeffrey L., Jeffrey Picciotto, John P. L. Woodward, and Paul T. Cummings. Compartmented mode workstation: Prototype highlights; *T-SE Jun 90 608-618*
Berson, Thomas A., *Guest Ed.*, and Steven B. Lipner, *Guest Ed.* Introduction to special section on security and privacy; *T-SE Jun 90 561*
Bi, Yao-Dong, *see* Tsai, Jeffrey J. P., *T-SE Aug 90 897-916*
Bishop, Judy M. The effect of data abstraction on loop programming techniques; *T-SE Apr 90 389-402*
Brilliant, Susan S., John C. Knight, and Nancy G. Leveson. Analysis of faults in an N-version software experiment; *T-SE Feb 90 238-247*
Brocklehurst, Sarah, P. Y. Chan, Bev Littlewood, and John Snell. Recalibrating software reliability models; *T-SE Apr 90 458-470*
Browne, James C., Taejae Lee, and John Werth. Experimental evaluation of a reusability-oriented parallel programming environment; *T-SE Feb 90 111-120*
Buhr, Raymond J. A., *see* Karam, Gerald M., *T-SE Aug 90 829-843*
Burke, Michael G., and Barbara G. Ryder. A critical analysis of incremental iterative data flow analysis algorithms; *T-SE Jul 90 723-728*

C

- Callahan, David**, Alan Carle, Mary Wolcott Hall, and Ken Kennedy. Constructing the procedure call multigraph (Corresp.); *T-SE Apr 90 483-487*
Camarinopoulos, L., *see* Becker, G., *T-SE Nov 90 1307-1310*

- Camilleri, Albert John.** Mechanizing CSP trace theory in higher order logic; *T-SE Sep 90 993-1004*
Carle, Alan, *see* Callahan, David, *T-SE Apr 90 483-487*
Catarci, Tiziana, *see* Angelaccio, Michele, *T-SE Oct 90 1150-1163*
Cha, Stephen S., *see* Leveson, Nancy G., *T-SE Apr 90 432-443*
Chan, P. Y., *see* Brocklehurst, Sarah, *T-SE Apr 90 458-470*
Chandersekaran, C. Sekar, *see* Tsai, Chii-Ren, *T-SE Jun 90 569-580*
Chang, Chung-Kuo. Bidding against competitors (Concise p.); *T-SE Jan 90 100-104*
Chang, Shi-Kuo. A visual language compiler for information retrieval by visual reasoning; *T-SE Oct 90 1136-1149*
Chang, Shi-Kuo, *Guest Ed.*, *see* Ichikawa, Tadao, *Guest Ed.*, *T-SE Oct 90 1105-1106*
Chen, Horng-Yuan, *see* Tsai, Jeffrey J. P., *T-SE Aug 90 897-916*
Chen, Yih-Farn, Michael Y. Nishimoto, and C. V. Ramamoorthy. The C information abstraction system; *T-SE Mar 90 325-334*
Chintamaneni, Prasad R., *see* Shieh, Yuan-Bao, *T-SE Apr 90 444-457*
Chmura, L. J., A. F. Norcio, and T. J. Wicinski. Evaluating software design processes by analyzing change data over time; *T-SE Jul 90 729-740*
Choi, In Jun, *see* Mannino, Michael V., *T-SE Nov 90 1258-1272*
Ciciani, Bruno, Daniel M. Dias, Balakrishna R. Iyer, and Philip S. Yu. A hybrid distributed centralized system structure for transaction processing; *T-SE Aug 90 791-806*
Ciminiera, Luigi, *see* Valenzano, Adriano, *T-SE Aug 90 858-869*
Clarke, Lori A., *see* Podgurski, Andy, *T-SE Sep 90 965-979*
Cohen, Jacques, *see* Hildum, David, *T-SE Jun 90 630-638*
Coleman, Derek, *see* Gerrard, Christopher Paul, *T-SE Jan 90 1-12*
Comerford, Liam, *see* White, Steve R., *T-SE Jun 90 619-629*
Constantine, Larry L. Comments, with reply, on 'On criteria for module interfaces' by D. Hoffman; *T-SE Dec 90 1441-1442* (Original paper, May 90 537-542)
Cordy, James R., Nicholas L. Eliot, and Michael G. Robertson. TuringTool: A user interface to aid in the software maintenance task; *T-SE Mar 90 294-301*
Cornell, Douglas W., and Philip S. Yu. An effective approach to vertical partitioning for physical design of relational databases; *T-SE Feb 90 248-258*
Craig, David W., and C. Murray Woodside. The rejection rate for tasks with random arrivals, deadlines, and preemptive scheduling (Concise p.); *T-SE Oct 90 1198-1208*
Crimi, Claudia, Angela Guercio, Giuliano Pacini, Genoveffa Tortora, and Maurizio Tucci. Automating visual language generation; *T-SE Oct 90 1122-1135*
Crouzet, Yves, *see* Arlat, Jean, *T-SE Feb 90 166-182*
Cummings, Paul T., *see* Berger, Jeffrey L., *T-SE Jun 90 608-618*
Cunningham, H. Conrad, *see* Roman, Gruia-Catalin, *T-SE Dec 90 1361-1373*

D

- Daech, Neil**, *see* Hanna, F. Keith, *T-SE Sep 90 949-964*
De Antonellis, Valeria, and Bruna Zonta. A disciplined approach to office analysis; *T-SE Aug 90 822-828*
Debray, Saumya K., and David S. Warren. Towards banishing the cut from Prolog; *T-SE Mar 90 335-349*
Degl'Innocenti, Michela, Gian Luigi Ferrari, Giuliano Pacini, and Franco Turini. RSF: A formalism for executable requirement specifications; *T-SE Nov 90 1235-1246*
de Maine, P. A. D., *see* Leong, Soklei, *T-SE Jun 90 639-646*
Denning, Dorothy E., *see* Lunt, Teresa F., *T-SE Jun 90 593-607*
Deo, Narsingh, *see* Sarkar, Dilip, *T-SE Jul 90 677-683*
De Vries, Ronald K. Reducing null messages in Misra's distributed discrete event simulation method; *T-SE Jan 90 82-91*
Dharap, Sanjeev, *see* Narayana, K. T., *T-SE Sep 90 1089-1103*
Dias, Daniel M., *see* Ciciani, Bruno, *T-SE Aug 90 791-806*
Dillon, Laura K. Verifying general safety properties of Ada tasking programs; *T-SE Jan 90 51-63*
Ding, Chen, and Prabhakar Mateti. A framework for the automated drawing of data structure diagrams; *T-SE May 90 543-557*
Domingue, John, *see* Eisenstadt, Marc, *T-SE Oct 90 1164-1177*
Dubois, Michel, and Christoph Scheurich. Memory access dependencies in shared-memory multiprocessors; *T-SE Jun 90 660-673*

E

- Eich, Margaret H., and Sharon M. Garard. The performance of flow graph locking (Corresp.); *T-SE Apr 90* 477-483
- Eisenstadt, Marc, John Domingue, Tim Rajan, and Enrico Motta. Visual knowledge engineering; *T-SE Oct 90* 1164-1177
- Eliot, Nicholas L., see Cordy, James R., *T-SE Mar 90* 294-301
- Erdogmus, Muhsin Hakan, and Robert Johnston. On the specification and synthesis of communicating processes; *T-SE Dec 90* 1412-1426

F

- Fabre, Jean-Charles, see Arlat, Jean, *T-SE Feb 90* 166-182
- Fang, Kwang-Ya, see Tsai, Jeffrey J. P., *T-SE Aug 90* 897-916
- Feldman, Frank A. A new spectral test for nonrandomness and the DES; *T-SE Mar 90* 261-267
- Ferrari, Gian Luigi, see Degl'Innocenti, Michela, *T-SE Nov 90* 1235-1246
- Freestone, D., see Pitt, D. H., *T-SE Dec 90* 1337-1343

G

- Gallimore, Robin M., see Gerrard, Christopher Paul, *T-SE Jan 90* 1-12
- Gallivan, K., D. Gannon, W. Jalby, A. Malony, and H. Wijshoff. Experimentally characterizing the behavior of multiprocessor memory systems: A case study (Concise p.); *T-SE Feb 90* 216-223
- Gannon, D., see Gallivan, K., *T-SE Feb 90* 216-223
- Garard, Sharon M., see Eich, Margaret H., *T-SE Apr 90* 477-483
- Garland, Stephen J., John V. Guttag, and James J. Horning. Debugging Larch shared language specifications; *T-SE Sep 90* 1044-1057
- Gaudiot, Jean-Luc, and Andrew Sohn. Data-driven parallel production systems; *T-SE Mar 90* 281-293
- Gerrard, Christopher Paul, Derek Coleman, and Robin M. Gallimore. Formal specification and design time testing; *T-SE Jan 90* 1-12
- Ghosal, Dipak, see Shieh, Yuan-Bao, *T-SE Apr 90* 444-457
- Gifford, David K., see Stamos, James W., *T-SE Jul 90* 710-722

SUBJECT INDEX

A

- Access control**
 extending objects to support multiple interfaces and access control; *Haipern, Brent, +, T-SE Nov 90* 1247-1257
Access control; cf. Computer network security; Computer security; Data security
Ada
 comments on 'Critical races in Ada programs' by G. M. Karam; *McNamee, Carole M., +, T-SE Dec 90* 1439-1440 (Original paper, Nov 89 1471-1480)
 comments on 'Measurement of Ada overhead in OSI-styled communications systems' by N. R. Howes and A. C. Weaver. *Karam, Gerald M., T-SE Dec 90* 1435-1439 (Original paper, Dec 89 1507-1517)
 data dependency graphs for Ada programs. *Moser, Louise E., T-SE May 90* 498-509
 effect of data abstraction on loop programming techniques; use on iterators. *Bishop, Judy M., T-SE Apr 90* 389-402
 formal verification of Ada programs using Penelope verification editor. *Guaspari, David, +, T-SE Sep 90* 1058-1075
 specifying Ada server tasks with executable formal grammars. *Hemmendinger, David, T-SE Jul 90* 741-754
 starvation and critical race analyzers for Ada. *Karam, Gerald M., +, T-SE Aug 90* 829-843
 using design diversity in specification, design, implementation, and testing of distributed Ada software. *Kelly, John P. J., +, T-SE Feb 90* 153-165
 verifying general safety properties of Ada tasking programs. *Dillon, Laura K., T-SE Jan 90* 51-63
Approximation methods; cf. Spline functions
Artificial Intelligence
 mapping AI production systems on data-driven architectures as amplified; by mapping RETE match algorithm. *Gaudiot, Jean-Luc, +, T-SE Mar 90* 281-293
 visual programming and program visualization technologies to support AI program development. *Eisenstadt, Marc, +, T-SE Oct 90* 1164-1177
Automatic testing
 automated software test data generation based on execution of programs under test, function-minimization methods, and dynamic data-flow analysis. *Korel, Bogdan, T-SE Aug 90* 870-879

B

- Bayes procedures**
 failure rate estimation for possibly correct program. *Becker, G., +, T-SE Nov 90* 1307-1310
Bibliographies
 framework for automated drawing of data structure diagrams. *Ding, Chen, +, T-SE May 90* 543-557
 model for multilevel security in computer networks. *Lu, Wen-Pai, +, T-SE Jun 90* 647-659
 using CSP for specification and verified decomposition of requirements for trustworthy systems. *Moore, Andrew P., T-SE Sep 90* 932-948

C

- Cache memories**
 memory access dependencies in shared-memory multiprocessors. *Dubois, Michel, +, T-SE Jun 90* 660-673
Coding/decoding
 tradeoffs in design of efficient algorithm-based error detection schemes for hypercube multiprocessors. *Balasubramanian, Vijay, +, T-SE Feb 90* 183-196
Coding/decoding; cf. Cryptography
Communication protocols; cf. Protocols
Communication system reliability
 fault injection methodology for dependability validation of fault-tolerant computer systems; applications of MESSALINE fault-injection tool. *Arlat, Jean, +, T-SE Feb 90* 166-182
Compilers
 ASN.1-C compiler design and implementation. *Neufeld, Gerald N., +, T-SE Oct 90* 1209-1220

- estimating speedup for asynchronous bottom-up parsing. *Sarkar, Dilip*, +, *T-SE Jul 90* 677-683
- transportable programming language system; bifunctional compiler system. *Leong, Soklei*, +, *T-SE Jun 90* 639-646
- visual language compiler based on SIL-ICON, for information retrieval by visual reasoning. *Chang, Shi-Kuo*, *T-SE Oct 90* 1136-1149
- Computation time**
- computational efficiency of parallel combinatorial OR-tree searches. *Li, Guo-Jie*, +, *T-SE Jan 90* 13-31
- computational improvements in Prolog applications by use of predicate variable pointers. *Karam, Gerald M.*, *T-SE May 90* 490-497
- estimating speedup for asynchronous bottom-up parsing. *Sarkar, Dilip*, +, *T-SE Jul 90* 677-683
- Computer architecture**
- ABYSS, architecture for protecting execution of application software. *White, Steve R.*, +, *T-SE Jun 90* 619-629
- Computer control**; cf. Digital control
- Computer economics**; cf. Software economics
- Computer fault diagnosis**
- tradeoffs in design of efficient algorithm-based error detection schemes for hypercube multiprocessors. *Balasubramanian, Vijay*, +, *T-SE Feb 90* 183-196
- Computer fault tolerance**
- fault injection methodology for dependability validation of fault-tolerant computer systems; applications of MESSALINE fault-injection tool. *Arlat, Jean*, +, *T-SE Feb 90* 166-182
- measurement and analysis of workload effects on fault latency in real-time systems. *Woodbury, Michael H.*, +, *T-SE Feb 90* 212-216
- modeling of hierarchical distributed systems with fault tolerance. *Shieh, Yuan-Bao*, +, *T-SE Apr 90* 444-457
- optimal distributed *t*-resilient election in complete asynchronous networks. *Itai, Alon*, +, *T-SE Apr 90* 415-420
- Computer fault tolerance**; cf. Software fault tolerance
- Computer graphics**
- framework for automated drawing of data structure diagrams. *Ding, Chen*, +, *T-SE May 90* 543-557
- STATEMATE, working environment with graphical orientation for development of complex reactive systems. *Harel, David*, +, *T-SE Apr 90* 403-414
- Computer interfaces**
- extending objects to support multiple interfaces and access control. *Hailpern, Brent*, +, *T-SE Nov 90* 1247-1257
- formal specification of look manager of dialog system. *Narayana, K. T.*, +, *T-SE Sep 90* 1089-1103
- TuringTool, user interface to aid in software maintenance. *Cordy, James R.*, +, *T-SE Mar 90* 294-301
- Computer language processors**
- incremental LR-based generation of parsers for arbitrary context-free grammars. *Heering, J.*, +, *T-SE Dec 90* 1344-1351
- Computer language processors**; cf. Compilers
- Computer languages**
- approximate reasoning about the semantic effects of program changes. *Moriconi, Mark*, +, *T-SE Sep 90* 980-992
- Cecil, sequencing constraint language for automatic static analysis generation. *Olender, Kurt M.*, +, *T-SE Mar 90* 268-280
- combining formal specification and design-time testing using OBJ executable specification language. *Gerrard, Christopher Paul*, +, *T-SE Jan 90* 1-12
- communication protocol modeling and verification approach based on specification language and Petri nets. *Suzuki, Toshinori*, +, *T-SE May 90* 523-536
- debugging LSL (Larch Shared Language) specifications. *Garland, Stephen J.*, +, *T-SE Sep 90* 1044-1057
- disciplined approach to office analysis with applicability to design of computer-based support system. *De Antonellis, Valeria*, +, *T-SE Aug 90* 822-828
- effect of data abstraction on loop programming techniques; use of iterators. *Bishop, Judy M.*, *T-SE Apr 90* 389-402
- extending objects to support multiple interfaces and access control. *Hailpern, Brent*, +, *T-SE Nov 90* 1247-1257
- implementing REV (Remote Evaluation Construct) for building distributed systems. *Stamos, James W.*, +, *T-SE Jul 90* 710-722
- language for specifying program transformations. *Hildum, David*, +, *T-SE Jun 90* 630-638
- mechanizing CSP (communicating sequential processes) trace theory in higher-order logic. *Camilleri, Albert John*, *T-SE Sep 90* 993-1004
- mixed programming metaphors in shared-dataspace model of concurrency. *Roman, Grigori-Catalin*, +, *T-SE Dec 90* 1361-1373
- Object-Oriented Functional Data Language (O²FDL). *Mannino, Michael V.*, +, *T-SE Nov 90* 1258-1272
- RSF (Requirement Specification Formalism), executable specification language for specifying and prototyping systems with time constraints. *Degl'Innocenti, Michela*, +, *T-SE Nov 90* 1235-1246
- STATEMATE, working environment with graphical orientation for development of complex reactive systems. *Harel, David*, +, *T-SE Apr 90* 403-414
- static analysis of temporal behavioral of programs in CSP-R real-time distributed language. *Liu, Leo Yuhsiang*, +, *T-SE Apr 90* 373-388
- transportable programming language system; bifunctional compiler system. *Leong, Soklei*, +, *T-SE Jun 90* 639-646
- using CSP for specification and verified decomposition of requirements for trustworthy systems. *Moore, Andrew P.*, *T-SE Sep 90* 932-948
- using Larch to specify Avalon/C++ objects. *Wing, Jeannette M.*, *T-SE Sep 90* 1076-1088
- Computer languages**; cf. Ada; Prolog; Query languages; Visual languages
- Computer maintenance**; cf. Computer fault diagnosis; Computer fault tolerance; Software maintenance
- Computer network security**
- model for multilevel security in computer networks. *Lu, Wen-Pai*, +, *T-SE Jun 90* 647-659
- Computer networks**; cf. Distributed computing; Open System Interconnection
- Computer operating systems**; cf. Software, operating systems
- Computer performance**
- hybrid monitor for behavior and performance analysis of distributed systems. *Haban, Dieter*, +, *T-SE Feb 90* 197-211
- Computer reliability**; cf. Computer fault tolerance; Software reliability
- Computer science**
- experimental computer science (special section). *T-SE Feb 90* 109-237
- Computer security**
- ABYSS, architecture for protecting execution of application software. *White, Steve R.*, +, *T-SE Jun 90* 619-629
- compartmented-mode secure workstation; prototype design and implementation. *Berger, Jeffrey L.*, +, *T-SE Jun 90* 608-618
- hookup theorem for multilevel security in restrictive composite systems. *McCullough, Daryl*, *T-SE Jun 90* 563-568
- identification of covert storage channels in secure systems. *Tsai, Chii-Ren*, +, *T-SE Jun 90* 569-580
- security and privacy (special section). *T-SE Jun 90* 561-629
- specification and verification method for preventing denial of service in absence of failures and integrity violations. *Yu, Che-Fu*, +, *T-SE Jun 90* 581-592
- Computer security**; cf. Computer network security; Data security
- Computer testing**; cf. Software testing
- Computers**; cf. Distributed computing; Memories; Parallel processing; *Specific topic*
- Control systems**; cf. Digital control; Discrete-event systems; Rail-transportation control systems
- Copyright protection**; cf. Software protection
- Cryptography**
- spectral test for detecting nonrandomness of finite binary strings; application to strings generated by DES. *Feldman, Frank A.*, *T-SE Mar 90* 261-267

D

- Data communication**; cf. Data security; Multiprocessing, interconnection; Protocols
- Data-flow computing**
- automated software test data generation based on execution of program under test, function-minimization methods, and dynamic data-flow analysis. *Korel, Bogdan*, *T-SE Aug 90* 870-879
- critical analysis of incremental iterative data-flow analysis algorithms. *Burke, Michael G.*, +, *T-SE Jul 90* 723-728
- empirical study of cost of data-flow testing. *Weyuker, Elaine J.*, *T-SE Feb 90* 121-128
- mapping AI production systems on data-driven architectures as amplified by mapping RETE match algorithm. *Gaudiot, Jean-Luc*, +, *T-SE Mar 90* 281-293
- performance of compile-time incremental data-flow-analysis algorithms. *Ryder, Barbara Gershon*, +, *T-SE Feb 90* 129-140
- Data processing**
- hybrid monitor for behavior and performance analysis of distributed systems. *Haban, Dieter*, +, *T-SE Feb 90* 197-211
- Data security**
- implementing functional data structures as updatable objects to avoid copying. *Milewski, Jaroslaw*, *T-SE Dec 90* 1427-1432
- Miró languages and tools to support visual specification of file system security. *Heydon, Allan*, +, *T-SE Oct 90* 1185-1197
- SeaView model for multilevel database security. *Lunt, Teresa F.*, +, *T-SE Jun 90* 593-607
- Data security**; cf. Computer network security; Computer security; Cryptography
- Data structures**
- efficient expressions for completely and partly unsuccessful batched search of tree-structured files. *Lang, S. D.*, +, *T-SE Dec 90* 1433-1435

- formal specification of iterators. *Lamb, David Alex, T-SE Dec 90 1352-1360*
- framework for automated drawing of data structure diagrams. *Ding, Chen, +, T-SE May 90 543-557*
- implementing functional data structures as updatable objects to avoid copying. *Milewski, Jaroslaw, T-SE Dec 90 1427-1432*
- Database management systems; cf. Database systems, concurrency operations**
- Database security; cf. Data security**
- Database system fault tolerance**
models of checkpointing and recovery; comparative analysis of various models. *Nicola, Victor F., +, T-SE Aug 90 807-821*
- Database systems**
Object-Oriented Functional Data Language (O²FDL). *Mannino, Michael V., +, T-SE Nov 90 1258-1272*
- Database systems; cf. Distributed database systems; Information systems**
- Database systems, concurrency operations**
multiversion cautious schedulers for database concurrency control. *Ibaraki, Toshihide, +, T-SE Mar 90 302-315*
- performance analysis of dynamic locking with no-waiting policy. *Ryu, In Kyung, +, T-SE Jul 90 684-698*
- performance of flow-graph locking as compared to two-phase locking. *Eich, Margaret H., +, T-SE Apr 90 477-483*
- Database systems, concurrency operations; cf. Distributed database systems, concurrency operations**
- Database systems, query processing**
automated test case generation for programs specified by relational algebra queries. *Tsai, W. T., +, T-SE Mar 90 316-324*
- optimal selection of secondary indexes in relational database planning. *Barcucci, Elena, +, T-SE Jan 90 32-38*
- visual language compiler based on SIL-ICON, for information retrieval by visual reasoning. *Chang, Shi-Kuo, T-SE Oct 90 1136-1149*
- Database systems, relational**
automated test case generation for programs specified by relational algebra queries. *Tsai, W. T., +, T-SE Mar 90 316-324*
- identifying extended entity-relationship object structures in relational schemas. *Markowitz, Victor M., +, T-SE Aug 90 777-790*
- optimal selection of secondary indexes in relational database planning. *Barcucci, Elena, +, T-SE Jan 90 32-38*
- system for abstracting relational information from C programs for purpose of program analysis. *Chen, Yih-Farn, +, T-SE Mar 90 325-334*
- two-step integer-programming based approach to vertical partitioning for physical design of relational databases. *Cornell, Douglas W., +, T-SE Feb 90 248-258*
- Database systems, relational; cf. Distributed database systems, relational**
- Database systems, searching; cf. Information retrieval; Query languages**
- Decision-making; cf. Bayes procedures**
- Decoding; cf. Coding/decoding**
- Digital communication; cf. Coding/decoding**
- Digital control**
Manufacturing Automation Protocol (MAP) performance in remote operation of computerized numerical controller. *Mortazavi, Behzad, T-SE Feb 90 231-237*
- Petri net tools for specification and analysis of discrete controllers. *Willson, Reg G., +, T-SE Jan 90 39-50*
- Digital system fault diagnosis; cf. Computer fault diagnosis**
- Digital system fault tolerance; cf. Computer fault tolerance**
- Discrete-event systems**
Petri net tools for specification and analysis of discrete controllers. *Willson, Reg G., +, T-SE Jan 90 39-50*
- reducing null messages in Misra's distributed discrete event simulation method for systems decomposable into feedforward and feedback networks. *De Vries, Ronald C., T-SE Jan 90 82-91*
- Displays; cf. Computer graphics**
- Distributed computing**
applying real-time monitoring to scheduling tasks with random execution times. *Haban, Dieter, +, T-SE Dec 90 1374-1389*
- bidding against competitors problem; application to mutual exclusion and dining philosophers problems. *Chang, Chung-Kuo, T-SE Jan 90 100-104*
- birth-death model of defect data for reliability analysis of software for large distributed systems. *Levendel, Yitzhak, T-SE Feb 90 141-152*
- dynamic change management in distributed systems; model based on evolving philosophers problem. *Kramer, Jeff, +, T-SE Nov 90 1293-1306*
- hybrid monitor for behavior and performance analysis of distributed systems. *Haban, Dieter, +, T-SE Feb 90 197-211*
- implementing REV (Remote Evaluation Construct for building distributed systems. *Stamos, James W., +, T-SE Jul 90 710-722*
- mechanically verifying concurrent programs with Boyer-Moore prover. *Goldschlag, David M., T-SE Sep 90 1005-1023*
- mixed programming metaphors in shared-dataspace model of concurrency. *Roman, Gruia-Catalin, +, T-SE Dec 90 1361-1373*
- modeling of hierarchical distributed systems with fault tolerance. *Shieh, Yuan-Bao, +, T-SE Apr 90 444-457*
- optimal distributed *t*-resilient election in complete asynchronous networks. *Itai, Alon, +, T-SE Apr 90 415-420*
- reducing null messages in Misra's distributed discrete event simulation method for systems decomposable into feedforward and feedback networks. *De Vries, Ronald C., T-SE Jan 90 82-91*
- specification and synthesis of communicating processes. *Erdogmus, Muhsin Hakan, +, T-SE Dec 90 1412-1426*
- specification and verification method for preventing denial of service in absence of failures and integrity violations. *Yu, Che-Fn, +, T-SE Jun 90 581-592*
- starvation and critical race analyzers for Ada. *Karam, Gerald M., +, T-SE Aug 90 829-843*
- static analysis of temporal behavioral of programs in CSP-R real-time distributed language. *Liu, Leo Yuhsiang, +, T-SE Apr 90 373-388*
- strategies for preventing communication deadlocks in distributed parallel programs. *Barbosa, Valmir C., T-SE Nov 90 1311-1316*
- theory of refinement of relational specifications; application to distributed systems and alternating-bit protocol. *Lam, Simon S., +, T-SE Jul 90 755-775*
- Visual Programmer's WorkBench distributed programming environment; early experience. *Rubin, Robert V., +, T-SE Oct 90 1107-1121*
- Distributed computing; cf. Distributed database systems; Local area networks; Multiprocessing; Protocols**
- Distributed database system fault tolerance**
update transport, technique for update synchronization in replicated database systems. *Singhal, Mukesh, T-SE Dec 90 1325-1336*
- Distributed database systems**
hybrid distributed centralized system structure for transaction processing; coherency and concurrency control protocol. *Ciciani, Bruno, +, T-SE Aug 90 791-806*
- Distributed database systems, concurrency operations**
hybrid distributed centralized system structure for transaction processing; coherency and concurrency control protocol. *Ciciani, Bruno, +, T-SE Aug 90 791-806*
- update transport, technique for update synchronization in replicated database systems. *Singhal, Mukesh, T-SE Dec 90 1325-1336*
- Distributed database systems, relational**
optimal semijoins for distributed database systems. *Mullin, James K., T-SE May 90 558-560*
- Distributed memories**
memory access dependencies in shared-memory multiprocessors. *Dubois, Michel, +, T-SE Jun 90 660-673*

E

Economics; cf. Software economics

Error-detection coding; cf. Coding/decoding

Estimation

consistency and limitations of function points as a priori measure of software system size. *Low, Graham C., +, T-SE Jan 90 64-71*debugging effort estimation using software metrics; relationship between debugging time and programming style. *Gorla, Narasimhaiah, +, T-SE Feb 90 223-231*software size estimation for object-oriented systems; relationship to project cost estimation. *Laranjeira, Luiz A., T-SE May 90 510-522*

Estimation; cf. Bayes procedures

F

Failure analysis

modeling of correlated failures and community error recovery in multiversion software. *Nicola, Victor F., +, T-SE Mar 90 350-359*

Fault diagnosis; cf. Computer fault diagnosis

Fault tolerance; cf. Computer fault tolerance; Software fault tolerance

Filtering; cf. Estimation

Flow networks; cf. Networks

Formal languages; cf. Languages

G

Grammar; cf. Languages

Graph theory

critical analysis of incremental iterative data-flow analysis algorithms. *Burke, Michael G., +, T-SE Jul 90 723-728*data dependency graphs for Ada programs. *Moser, Louise E., T-SE May 90 498-509*graph model of software evolution. *Luqi, T-SE Aug 90 917-927*

lower bound on number of processors and time for scheduling precedence graphs with communication costs. *Al-Mouhamed, Mayez A.*, T-SE Dec 90 1390-1401

performance of flow-graph locking as compared to two-phase locking. *Eich, Margaret H.*, +, T-SE Apr 90 477-483

region scheduling approach to detecting and redistributing parallelism, using program dependence graph. *Gupta, Rajiv*, +, T-SE Apr 90 421-431

Graph theory; cf. Trees, graphs

Graphics; cf. Computer graphics

H

Hierarchical systems

modeling of hierarchical distributed systems with fault tolerance. *Shieh, Yuan-Bao*, +, T-SE Apr 90 444-457

I

Iconic languages; cf. Visual languages**IEEE Transactions on Software Engineering**

list of reviewers. T-SE Dec 90 1322-1324

Indexes

optimal selection of secondary indexes in relational database planning. *Barcucci, Elena*, +, T-SE Jan 90 32-38

Industrial control; cf. Numerical control**Information retrieval**

visual language compiler based on SIL-ICON, for information retrieval by visual reasoning. *Chang, Shi-Kuo*, T-SE Oct 90 1136-1149

Information systems

ontological model of an information system. *Wand, Yair*, +, T-SE Nov 90 1282-1292

Information systems; cf. Database systems; Indexes**Integer programming**

two-step integer-programming based approach to vertical partitioning for physical design of relational databases. *Cornell, Douglas W.*, +, T-SE Feb 90 248-258

Interpolation; cf. Spline functions

L

Languages

specifying Ada server tasks with executable formal grammars. *Hemmendinger, David*, T-SE Jul 90 741-754

Languages; cf. Ada; Computer languages**Legal factors**; cf. Software protection**Linear programming**; cf. Integer programming**Local area networks**; cf. Open System Interconnection**Local area networks, access**

properties of timed-token medium-access protocols for LANs. *Valenzano, Adriano*, +, T-SE Aug 90 858-869

Logic

approximate reasoning about the semantic effects of program changes. *Moriconi, Mark*, +, T-SE Sep 90 980-992

mechanically verifying concurrent programs with Boyer-Moore prover. *Goldschlag, David M.*, T-SE Sep 90 1005-1023

mechanizing CSP (communicating sequential processes) trace theory in higher-order logic. *Camilleri, Albert John*, T-SE Sep 90 993-1004

VERITAS⁺, specification logic based on dependent types for specifying and verifying software. *Hanna, F. Keith*, +, T-SE Sep 90 949-964

Logic programming

RSF (Requirement Specification Formalism), executable specification language for specifying and prototyping systems with time constraints. *Degl'Innocenti, Michela*, +, T-SE Nov 90 1235-1246

Logic programming; cf. Prolog

M

Maintenance; cf. Software maintenance**Manufacturing automation**; cf. Numerical control**Mathematical programming**; cf. Integer programming**Measurement**; cf. Monitoring**Memories**

experimentally characterizing behavior of multiprocessor memory systems; case study involving Alliant FX/8. *Gallivan, K.*, +, T-SE Feb 90 216-223

Memories; cf. Cache memories; Distributed memories**Memory management**

memory access dependencies in shared-memory multiprocessors. *Dubois, Michel*, +, T-SE Jun 90 660-673

Microprocessors; cf. Multimicroprocessing**Minimization methods**; cf. Optimization methods**Monitoring**

applying real-time monitoring to scheduling tasks with random execution times. *Haban, Dieter*, +, T-SE Dec 90 1374-1389

hybrid monitor for behavior and performance analysis of distributed systems. *Haban, Dieter*, +, T-SE Feb 90 197-211

noninterference monitoring and replay mechanism for real-time parallel software testing and debugging. *Tsai, Jeffrey J. P.*, +, T-SE Aug 90 897-916

Multilevel systems; cf. Hierarchical systems**Multimicroprocessing**

allocation model for mapping real-time applications to distributed microprocessor systems. *Houstis, Catherine E.*, T-SE Jul 90 699-709

Multiprocessing

comments on 'Allocating programs containing branches and loops within multiple processor system' by D. Towsley. *Kaudel, Fred*, T-SE Apr 90 471 (Original paper, Oct 86 1018-1024)†

correction to 'Allocating programs containing branches and loops within a multiple processor system' (Oct 86 1018-1024). *Towsley, D.*, T-SE Apr 90 472

estimating speedup for asynchronous bottom-up parsing. *Sarkar, Dilip*, +, T-SE Jul 90 677-683

experimentally characterizing behavior of multiprocessor memory systems; case study involving Alliant FX/8. *Gallivan, K.*, +, T-SE Feb 90 216-223

lower bound on number of processors and time for scheduling precedence graphs with communication costs. *Al-Mouhamed, Mayez A.*, T-SE Dec 90 1390-1401

memory access dependencies in shared-memory multiprocessors. *Dubois, Michel*, +, T-SE Jun 90 660-673

region scheduling approach to detecting and redistributing parallelism, using program dependence graph. *Gupta, Rajiv*, +, T-SE Apr 90 421-431

rejection rate for tasks with random arrivals, deadlines, and preemptive scheduling in safety-related computer systems. *Craig, David W.*, +, T-SE Oct 90 1198-1208

Multiprocessing; cf. Data-flow computing; Distributed computing; Multimicroprocessing; Supercomputers

Multiprocessing, interconnection

tradeoffs in design of efficient algorithm-based error detection schemes for hypercube multiprocessors. *Balasubramanian, Vijay*, +, T-SE Feb 90 183-196

N

Networks

reducing null messages in Misra's distributed discrete event simulation method for systems decomposable into feedforward and feedback networks. *De Vries, Ronald C.*, T-SE Jan 90 82-91

Networks; cf. Multiprocessing, interconnection; Petri nets

Numerical control

Manufacturing Automation Protocol (MAP) performance in remote operation of computerized numerical controller. *Mortazavi, Behzad*, T-SE Feb 90 231-237

Numerical methods; cf. Optimization methods

O

Object-oriented programming

extending objects to support multiple interfaces and access control. *Hailpern, Brent*, +, T-SE Nov 90 1247-1257

Object-Oriented Functional Data Language (O²FDL). *Mannino, Michael V.*, +, T-SE Nov 90 1258-1272

software size estimation for object-oriented systems; relationship to project cost estimation. *Laranjeira, Luiz A.*, T-SE May 90 510-522

Office automation

disciplined approach to office analysis with applicability to design of computer-based support system. *De Antonellis, Valeria*, +, T-SE Aug 90 822-828

Open System Interconnection

comments on 'Measurement of Ada overhead in OSI-style communications systems' by N. R. Howes and A. C. Weaver. *Karam, Gerald M.*, T-SE Dec 90 1435-1439 (Original paper, Dec 89 1507-1517)

Operating systems; cf. Software, operating systems

Optimization methods

automated software test data generation based on execution of program under test, function-minimization methods, and dynamic data-flow analysis. *Korel, Bogdan*, T-SE Aug 90 870-879

strategies for preventing communication deadlocks in distributed parallel programs. *Barbosa, Valmir C.*, T-SE Nov 90 1311-1316

Optimization methods; cf. Integer programming
OSI; cf. Open System Interconnection

P

Parallel processing

- computational efficiency of parallel combinatorial OR-tree searches. *Li, Guo-Jie*, +, *T-SE Jan 90* 13-31
- experimental evaluation of resusability-oriented parallel programming environment. *Browne, James C.*, +, *T-SE Feb 90* 111-120
- noninterference monitoring and replay mechanism for real-time parallel software testing and debugging. *Tsai, Jeffrey J. P.*, +, *T-SE Aug 90* 897-916
- use of comments analysis to detect decomposition errors in programs. *Howden, William E.*, *T-SE Jan 90* 72-81

Parallel processing; cf. Data-flow computing; Supercomputers

Petri nets

- communication protocol modeling and verification approach based on specification language and Petri nets. *Suzuki, Toshinori*, +, *T-SE May 90* 523-536
- formal analysis of alternating-bit protocol by temporal Petri nets. *Suzuki, Ichiro*, *T-SE Nov 90* 1273-1281
- modeling of hierarchical distributed systems with fault tolerance. *Shieh, Yuan-Bao*, +, *T-SE Apr 90* 444-457
- Petri net tools for specification and analysis of discrete controllers. *Willson, Reg G.*, +, *T-SE Jan 90* 39-50

Polynomial approximation; cf. Spline functions

Privacy; cf. Cryptography; Data security

Programming; cf. Software design/development

Prolog

- computational improvements in Prolog applications by use of predicate variable pointers. *Karam, Gerald M.*, *T-SE May 90* 490-497
- reducing use of cuts in Prolog programming. *Debray, Saumya K.*, +, *T-SE Mar 90* 335-349

Protocols

- comments, with reply, on 'On the projection method for protocol verification' by T.-Y. Cheung. *Hirakawa, Yutaka*, *T-SE Mar 90* 370-371 (Original paper, Nov 86 1088-1089)
- communication protocol modeling and verification approach based on specification language and Petri nets. *Suzuki, Toshinori*, +, *T-SE May 90* 523-536
- formal analysis of alternating-bit protocol by temporal Petri nets. *Suzuki, Ichiro*, *T-SE Nov 90* 1273-1281
- hybrid distributed centralized system structure for transaction processing; coherency and concurrency control protocol. *Ciciani, Bruno*, +, *T-SE Aug 90* 791-806
- Manufacturing Automation Protocol (MAP) performance in remote operation of computerized numerical controller. *Mortazavi, Behzad*, *T-SE Feb 90* 231-237
- theory of refinement of relational specifications; application to distributed systems and alternating-bit protocol. *Lam, Simon S.*, +, *T-SE Jul 90* 755-775

Q

Query languages

- QBD*, graphical query language with recursion. *Angelaccio, Michele*, +, *T-SE Oct 90* 1150-1163

Queuing analysis

- models of checkpointing and recovery; comparative analysis of various models. *Nicola, Victor F.*, +, *T-SE Aug 90* 807-821
- rejection rate for tasks with random arrivals, deadlines, and preemptive scheduling in safety-related computer systems. *Craig David W.*, +, *T-SE Oct 90* 1198-1208

R

Rail-transportation control systems

- fault injection methodology for dependability validation of fault-tolerant computer systems; applications of MESSALINE fault-injection tool. *Arlat, Jean*, +, *T-SE Feb 90* 166-182

Random variables

- spectral test for detecting nonrandomness of finite binary strings; application to strings generated by DES. *Feldman, Frank A.*, *T-SE Mar 90* 261-267

Real-time systems

- allocation model for mapping real-time applications to distributed microprocessor systems. *Houstis, Catherine E.*, *T-SE Jul 90* 699-709
- applying real-time monitoring to scheduling tasks with random execution times. *Haban, Dieter*, +, *T-SE Dec 90* 1374-1389
- measurement and analysis of workload effects on fault latency in real-time systems. *Woodbury, Michael H.*, +, *T-SE Feb 90* 212-216

noninterference monitoring and replay mechanism for real-time parallel software testing and debugging. *Tsai, Jeffrey J. P.*, +, *T-SE Aug 90* 897-916

rejection rate for tasks with random arrivals, deadlines, and preemptive scheduling in safety-related computer systems. *Craig David W.*, +, *T-SE Oct 90* 1198-1208

scheduling processes with release times, deadlines, precedence, and exclusion relations. *Xu, Jia*, +, *T-SE Mar 90* 360-369

static analysis of temporal behavioral of programs in CSP-R real-time distributed language. *Liu, Leo Yuhshiang*, +, *T-SE Apr 90* 373-388

Reliability; cf. Communication system reliability; Failure analysis; Software reliability

Reliability estimation

Bayesian method for estimating failure rate of possibly correct programs. *Becker, G.*, +, *T-SE Nov 90* 1307-1310

Reliability growth; cf. Software reliability growth

S

Scheduling

applying real-time monitoring to scheduling tasks with random execution times. *Haban, Dieter*, +, *T-SE Dec 90* 1374-1389

lower bound on number of processors and time for scheduling precedence graphs with communication costs. *Al-Mouhamed, Mayez A.*, *T-SE Dec 90* 1390-1401

multiversion cautious schedulers for database concurrency control. *Ibaraki, Toshihide*, +, *T-SE Mar 90* 302-315

region scheduling approach to detecting and redistributing parallelism using program dependence graph. *Gupta, Rajiv*, +, *T-SE Apr 90* 421-433

rejection rate for tasks with random arrivals, deadlines, and preemptive scheduling in safety-related computer systems. *Craig David W.*, +, *T-SE Oct 90* 1198-1208

scheduling processes with release times, deadlines, precedence, and exclusion relations. *Xu, Jia*, +, *T-SE Mar 90* 360-369

Search methods

computational efficiency of parallel combinatorial OR-tree searches. *Li, Guo-Jie*, +, *T-SE Jan 90* 13-31

efficient expressions for completely and partly unsuccessful batched search of tree-structured files. *Lang, S. D.*, +, *T-SE Dec 90* 1433-1435

KIDS (Kestrel Interactive Development System) for semiautomated development of programs from formal specifications; derivation of algorithm for *k*-queens problem. *Smith, Douglas R.*, *T-SE Sep 90* 1024-1043

Security; cf. Access control; Computer security; Data security

Signal estimation; cf. Estimation

Simulation

reducing null messages in Misra's distributed discrete event simulation method for systems decomposable into feedforward and feedback networks. *De Vries, Ronald C.*, *T-SE Jan 90* 82-91

Software

experimental computer science (special section). *T-SE Feb 90* 109-237

formal methods in software engineering (special issue). *T-SE Sep 90* 929-1103

Software; cf. Computer languages

Software, language processors; cf. Computer language processors

Software, operating systems

identification of covert storage channels in secure systems. *Tsai, Chii-Ren*, +, *T-SE Jun 90* 569-580

scheduling processes with release times, deadlines, precedence, and exclusion relations. *Xu, Jia*, +, *T-SE Mar 90* 360-369

Software debugging; cf. Software reliability

Software design/development

Cecil, sequencing constraint language for automatic static analysis/generation. *Olender, Kurt M.*, +, *T-SE Mar 90* 268-280

computational improvements in Prolog applications by use of predicate variable pointers. *Karam, Gerald M.*, *T-SE May 90* 490-497

constructing procedure-call multigraph with allowance for recursion. *Callahan, David*, +, *T-SE Apr 90* 483-487

criteria for software module interfaces. *Hoffman, Daniel*, *T-SE May 90* 537-542†

data dependency graphs for Ada programs. *Moser, Louise E.*, *T-SE May 90* 498-509

debugging effort estimation using software metrics; relationship between debugging time and programming style. *Gorla, Narasimhaiah*, +, *T-SE Feb 90* 223-231

effect of data abstraction on loop programming techniques; use of iterators. *Bishop, Judy M.*, *T-SE Apr 90* 389-402

graph model of software evolution. *Luqi*, *T-SE Aug 90* 917-927

implementing REV (Remote Evaluation Construct for building distributed systems. *Siamos, James W.*, +, *T-SE Jul 90* 710-722

KIDS (Kestrel Interactive Development System) for semiautomated development of programs from formal specifications; derivation of algorithm for *k*-queens problem. *Smith, Douglas R.*, *T-SE Sep 90* 1024-1043

- language for specifying program transformations. *Hildum, David*, +, T-SE Jun 90 630-638
- reducing use of cuts in Prolog programming. *Debray, Saumya K.*, +, T-SE Mar 90 335-349
- RSF (Requirement Specification Formalism), executable specification language for specifying and prototyping systems with time constraints. *Degl'Innocenti, Michela*, +, T-SE Nov 90 1235-1246
- starvation and critical race analyzers for Ada. *Karam, Gerald M.*, +, T-SE Aug 90 829-843
- Software development environments**
- EVS (Evolution Support Environment) system for software modification over time. *Ramamoorthy, C. V.*, +, T-SE Nov 90 1225-1234
- experimental evaluation of resusability-oriented parallel programming environment. *Browne, James C.*, +, T-SE Feb 90 111-120
- STATEMATE, working environment with graphical orientation for development of complex reactive systems. *Harel, David*, +, T-SE Apr 90 403-414
- TuringTool, user interface to aid in software maintenance. *Cordy, James R.*, +, T-SE Mar 90 294-301
- Visual Programmer's WorkBench distributed programming environment; early experience. *Rubin, Robert V.*, +, T-SE Oct 90 1107-1121
- visual programming and program visualization technologies to support AI program development. *Eisenstadt, Marc*, +, T-SE Oct 90 1164-1177
- Software development environments; cf.** Ada; Logic programming
- Software development management**
- consistency and limitations of function points as a priori measure of software system size. *Low, Graham C.*, +, T-SE Jan 90 64-71
- evaluating software design processes by analyzing code-change data over time. *Chmura, L. J.*, +, T-SE Jul 90 729-740
- Software economics**
- empirical study of cost of data-flow testing. *Weyuker, Elaine J.*, T-SE Feb 90 121-128
- optimal selection of secondary indexes in relational database planning. *Barucci, Elena*, +, T-SE Jan 90 32-38
- software size estimation for object-oriented systems; relationship to project cost estimation. *Laranjeira, Luiz A.*, T-SE May 90 510-522
- Software fault tolerance**
- analysis of faults in *N*-version software experiment. *Brilliant, Susan S.*, +, T-SE Feb 90 238-247
- fault injection methodology for dependability validation of fault-tolerant computer systems; applications of MESSALINE fault-injection tool. *Arlat, Jean*, +, T-SE Feb 90 166-182
- modeling of correlated failures and community error recovery in multiversion software. *Nicola, Victor E.*, +, T-SE Mar 90 350-359
- use of self checks and voting in software error detection; empirical study. *Leveson, Nancy G.*, +, T-SE Apr 90 432-443
- using design diversity in specification, design, implementation, and testing of distributed Ada software. *Kelly, John P. J.*, +, T-SE Feb 90 153-165
- Software maintenance**
- approximate reasoning about the semantic effects of program changes. *Moriconi, Mark*, +, T-SE Sep 90 980-992
- EVS (Evolution Support Environment) system for software modification over time. *Ramamoorthy, C. V.*, +, T-SE Nov 90 1225-1234
- formal model of program dependences and its implications for software testing, debugging, and maintenance. *Podgurski, Andy*, +, T-SE Sep 90 965-979
- graph model of software evolution. *Luqi*, T-SE Aug 90 917-927
- language for specifying program transformations. *Hildum, David*, +, T-SE Jun 90 630-638
- system for abstracting relational information from C programs for purpose of program analysis. *Chen, Yih-Farn*, +, T-SE Mar 90 325-334
- TuringTool, user interface to aid in software maintenance. *Cordy, James R.*, +, T-SE Mar 90 294-301
- Software management; cf.** Software development management; Software economics
- Software metrics**
- consistency and limitations of function points as a priori measure of software system size. *Low, Graham C.*, +, T-SE Jan 90 64-71

- experimental evaluation of resusability-oriented parallel programming environment. *Browne, James C.*, +, T-SE Feb 90 111-120
- software size estimation for object-oriented systems; relationship to project cost estimation. *Laranjeira, Luiz A.*, T-SE May 90 510-522
- Software performance**
- performance of compile-time incremental data-flow-analysis algorithms. *Ryder, Barbara Gershon*, +, T-SE Feb 90 129-140
- Software protection**
- ABYSS, architecture for protecting execution of application software. *White, Steve R.*, +, T-SE Jun 90 619-629
- Software reliability**
- Bayesian method for estimating failure rate of possibly correct program. *Becker, G.*, +, T-SE Nov 90 1307-1310
- birth-death model of defect data for reliability analysis of software for large distributed systems. *Levendel, Ytzhak*, T-SE Feb 90 141-152
- debugging LSL (Larch Shared Language) specifications. *Garland, Stephen J.*, +, T-SE Sep 90 1044-1057
- formal model of program dependences and its implications for software testing, debugging, and maintenance. *Podgurski, Andy*, +, T-SE Sep 90 965-979
- noninterference monitoring and replay mechanism for real-time parallel software testing and debugging. *Tsai, Jeffrey J. P.*, +, T-SE Aug 90 897-916
- state constraints and pathwise decomposition of programs for use in program simplification, testing, and verification. *Huang J. C.*, T-SE Aug 90 880-896
- Software reliability; cf.** Software fault tolerance
- Software reliability growth**
- recalibrating software reliability growth models using spline functions to improve reliability prediction. *Brocklehurst, Sarah*, +, T-SE Apr 90 458-470
- Software requirements and specifications**
- combining formal specification and design-time testing using OBJ executable specification language. *Gerrard, Christopher Paul*, +, T-SE Jan 90 1-12
- communication protocol modeling and verification approach based on specification language and Petri nets. *Suzuki, Toshinori*, +, T-SE May 90 523-536
- debugging LSL (Larch Shared Language) specifications. *Garland, Stephen J.*, +, T-SE Sep 90 1044-1057
- derivation of conformance tests from LOTOS specifications. *Pitt, D. H.*, +, T-SE Dec 90 1337-1343
- disciplined approach to office analysis with applicability to design of computer-based support system. *De Antonellis, Valeria*, +, T-SE Aug 90 822-828
- formal specification of iterators. *Lamb, David Alex*, T-SE Dec 90 1352-1360
- formal specification of look manager of dialog system. *Narayana, K. T.*, +, T-SE Sep 90 1089-1103
- Petri net tools for specification and analysis of discrete controllers. *Willson, Reg G.*, +, T-SE Jan 90 39-50
- RSF (Requirement Specification Formalism), executable specification language for specifying and prototyping systems with time constraints. *Degl'Innocenti, Michela*, +, T-SE Nov 90 1235-1246
- specification and synthesis of communicating processes. *Erdognus, Muhsin Hakan*, +, T-SE Dec 90 1412-1426
- specifying Ada server tasks with executable formal grammars. *Hemmendinger, David*, T-SE Jul 90 741-754
- theory of refinement of relational specifications; application to distributed systems and alternating-bit protocol. *Lam, Simon S.*, +, T-SE Jul 90 755-775
- unreachable states in model-oriented specifications. *Nicholl, Robin A.*, T-SE Apr 90 472-477
- using CSP for specification and verified decomposition of requirements for trustworthy systems. *Moore, Andrew P.*, T-SE Sep 90 932-948
- using design diversity in specification, design, implementation, and testing of distributed Ada software. *Kelly, John P. J.*, +, T-SE Feb 90 153-165
- using Larch to specify Avalon/C++ objects. *Wing, Jeannette M.*, T-SE Sep 90 1076-1088
- VERITAS⁺, specification logic based on dependent types for specifying and verifying software. *Hanna, F. Keith*, +, T-SE Sep 90 949-964
- Software reusability**
- experimental evaluation of resusability-oriented parallel programming environment. *Browne, James C.*, +, T-SE Feb 90 111-120
- Software safety**
- using CSP for specification and verified decomposition of requirements for trustworthy systems. *Moore, Andrew P.*, T-SE Sep 90 932-948
- verifying general safety properties of Ada tasking programs. *Dillon, Laura K.*, T-SE Jan 90 51-63
- Software testing**
- automated software test data generation based on execution of program under test, function-minimization methods, and dynamic data-flow analysis. *Korel, Bogdan*, T-SE Aug 90 870-879
- automated test case generation for programs specified by relational algebra queries. *Tsai, W. T.*, +, T-SE Mar 90 316-324
- combining formal specification and design-time testing using OBJ executable specification language. *Gerrard, Christopher Paul*, +, T-SE Jan 90 1-12
- derivation of conformance tests from LOTOS specifications. *Pitt, D. H.*, +, T-SE Dec 90 1337-1343
- empirical study of cost of data-flow testing. *Weyuker, Elaine J.*, T-SE Feb 90 121-128
- evaluation of partition testing. *Hamlet, Dick*, +, T-SE Dec 90 1402-1411

formal model of program dependences and its implications for software testing, debugging, and maintenance. *Podgurski, Andy*, +, *T-SE Sep 90* 965-979

noninterference monitoring and replay mechanism for real-time parallel software testing and debugging. *Tsai, Jeffrey J. P.*, +, *T-SE Aug 90* 897-916
theory of fault-based program testing. *Morell, Larry J.*, *T-SE Aug 90* 844-857

using design diversity in specification, design, implementation, and testing of distributed Ada software. *Kelly, John P. J.*, +, *T-SE Feb 90* 153-165

Software testing; cf. Software reliability

Software verification and validation

data dependency graphs for Ada programs. *Moser, Louise E.*, *T-SE May 90* 498-509

experimental computer science (special section). *T-SE Feb 90* 109-237

fault injection methodology for dependability validation of fault-tolerant computer systems; applications of MESSALINE fault-injection tool. *Arlat, Jean*, +, *T-SE Feb 90* 166-182

formal verification of Ada programs using Penelope verification editor. *Guaspari, David*, +, *T-SE Sep 90* 1058-1075

mechanically verifying concurrent programs with Boyer-Moore prover. *Goldschlag, David M.*, *T-SE Sep 90* 1005-1023

use of comments analysis to detect decomposition errors in programs. *Howden, William E.*, *T-SE Jan 90* 72-81

using CSP for specification and verified decomposition of requirements for trustworthy systems. *Moore, Andrew P.*, *T-SE Sep 90* 932-948

verifying general safety properties of Ada tasking programs. *Dillon, Laura K.*, *T-SE Jan 90* 51-63

VERITAS⁺, specification logic based on dependent types for specifying and verifying software. *Hanna, F. Keith*, +, *T-SE Sep 90* 949-964

Software verification and validation; cf. Software reliability

Source coding; cf. Cryptography

Special issues/sections

experimental computer science (special section). *T-SE Feb 90* 109-237

formal methods in software engineering. *T-SE Sep 90* 929-1103

security and privacy (special section). *T-SE Jun 90* 561-629

visual programming (special section). *T-SE Oct 90* 1105-1197

Spline functions

recalibrating software reliability growth models using spline functions to improve reliability prediction. *Brocklehurst, Sarah*, +, *T-SE Apr 90* 458-470

Stochastic processes; cf. Random variables

Storage; cf. Memories

Structured programming

control and definition modularization, improved software design technique for organizing programs. *Yadav, Surya B.*, *T-SE Jan 90* 92-99

Supercomputers

experimentally characterizing behavior of multiprocessor memory systems; case study involving Alliant FX/8. *Gallivan, K.*, +, *T-SE Feb 90* 216-223

Synchronization

bidding against competitors problem; application to mutual exclusion and dining philosophers problems. *Chang, Chung-Kuo*, *T-SE Jan 90* 100-104

T

Testing; cf. Software testing

Text processing

architecture of automatic visual language generator using inference grammar techniques; application to visual text editing|1. *Crimin, Claudia*, +, *T-SE Oct 90* 1122-1135

Timing

static analysis of temporal behavioral of programs in CSP-R real-time distributed language. *Liu, Leo Yuhshiang*, +, *T-SE Apr 90* 373-388

Token passing; cf. Local area networks, access

Trees, graphs

efficient expressions for completely and partly unsuccessful batched search of tree-structured files. *Lang S. D.*, +, *T-SE Dec 90* 1433-1435

V

Visual languages

AI program development using visual programming and program visualization technologies. *Eisenstadt, Marc*, +, *T-SE Oct 90* 1164-1177

architecture of automatic visual language generator using inference grammar techniques; application to visual text editing|1. *Crimin, Claudia*, +, *T-SE Oct 90* 1122-1135

compiler based on SIL-ICON, for information retrieval by visual reasoning. *Chang, Shi-Kuo*, *T-SE Oct 90* 1136-1149

HI-VISUAL, iconic programming system. *Hirakawa, Masahito*, +, *T-SE Oct 90* 1178-1184

Miró languages and tools to support visual specification of file systems security. *Heydon, Allan*, +, *T-SE Oct 90* 1185-1197

QBD, graphical query language with recursion. *Angelaccio, Michele*, +, *T-SE Oct 90* 1150-1163

Visual Programmer's WorkBench distributed programming environment; early experience. *Rubin, Robert V.*, +, *T-SE Oct 90* 1107-1121

visual programming (special section). *T-SE Oct 90* 1105-1197

W

Workstations

compartmented-mode secure workstation; prototype design and implementation. *Berger, Jeffrey L.*, +, *T-SE Jun 90* 608-618
